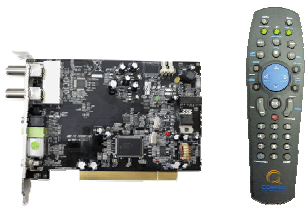
VideoMate S350

Satellite TV Tuner & Capture Card with Compro Exclusive Power Up Technology



Introduction

Compro VideoMate S350 is a digital satellite TV tuner card for watching and recording free-to-air high quality DVB-S TV shows on your PC. VideoMate S350 accompanied by Compro's exclusive Power Up Technology, remote controlled power on/off, with superior HDTV video quality. It brings a world of enhanced TV services directly to your PC, turning your computer into a home entertainment center by bringing digital satellite TV viewing and personal digital video recording capabilities to your PC.

VideoMate S350 supports internet via satellite, DiSEqC 1.2, Transport Stream and MPEG-2 digital TV recording to get the best experience in DVB-S TV reception. Also, VideoMate S350 provides many useful features in software: Picture in/out Picture to watch live TV/playback video files at the same time and support up to 4 windows open; customize channel order and my favorite channel list for more easy-to-use; Video Desktop to setup your live TV screen as wallpaper mode, customize brightness, hue, saturation, contrast, sharpness, and TV stereo in each TV channel. All these features will turn your PC into the powerful DVB-S watching and recording station to enrich your life.

Complete with a 37-key ergonomic design remote and bundled with Compro's exclusive ComproDTV 2, ComproDVD 2 and Ulead PhotoExplorer 8.5 SE software, VideoMate S350 gives users a complete and convenient control solution for easy DVB-S viewing and recording.
